# COMC004: ORGANIZATIONAL BEHAVIOR AND LEADERSHIP

## Lesson Plan | M.Com Semester II | Academic Year 2025-26

---

## COURSE INFORMATION

• **Course Code:** COMC004

• **Course Title:** Organizational Behavior and Leadership

• **Program:** Master of Commerce (M.Com)

• **Semester:** Semester II

• **Academic Year:** 2025-26

• **Credits:** 4 (3 Lecture + 1 Tutorial)

• **Duration:** 10 weeks

• **Class Schedule:** Three 1-hour sessions per week

• **Total Contact Hours:** 30 hours

• **Prerequisites:** NIL

---

## COURSE LEARNING OUTCOMES

### CLO 1 - Bloom's Level: Remember/Understand

Explore and comprehend core concepts of organizational behavior and leadership in traditional and digital contexts, including the impact of AI on work behavior and Indian perspectives on personhood.

**Assessment Methods:** End-Term Examination, Class Tests 1

---

### CLO 2 - Bloom's Level: Analyze

Analyze the impact of personality, perception, motivation, and emotions on individual and organizational performance using both Western theories and Indian philosophical frameworks.

**Assessment Methods:** End-Term Examination, Class Test 1, Assignment 1

---

### CLO 3 - Bloom's Level: Analyze/Evaluate

Interpret team dynamics and group behavior in organizational settings including virtual teams, agile structures, and self-managing teams, and evaluate strategies for managing conflict and misbehavior.

**Assessment Methods:** End-Term Examination, Class Tests 2 & 3, Assignment 2

---

### CLO 4 - Bloom's Level: Evaluate/Create

Evaluate leadership styles and their influence on organizational culture and outcomes in hybrid organizations, and critically assess cross-cultural, ethical, and spiritual leadership approaches including indigenous models.

**Assessment Methods:** End-Term Examination, Class Test 3, Assignment 2

---

### CLO 5 - Bloom's Level: Create

Design contextually-appropriate organizational interventions and leadership strategies that integrate behavioral insights, Indian philosophical wisdom, and contemporary digital workplace realities.

**Assessment Methods:** End-Term Examination, Assignments 1 & 2

---

## ALIGNMENT WITH PROGRAM GOALS

This course advances the M.Com program's emphasis on critical thinking, ethical leadership, and contextual application of management theories. CLOs map to program-level outcomes:

- **Analytical Capability:** CLO 2, 3, 4
- **Ethical Reasoning:** CLO 1, 4, 5
- **Applied Problem-Solving:** CLO 3, 5

• **Cultural Intelligence:** CLO 1, 2, 4, 5
• **Digital Literacy:** CLO 1, 3

---

# LEARNING CONTRACT AND STUDENT RESPONSIBILITIES

Success in this flipped learning model requires active partnership:

**Before Class:**

1. Complete readings thoroughly from assigned textbooks
2. Engage with AI-assisted preparation tasks (1.5-2 hours/week)
3. Come with questions formed and initial thinking developed

**During Class:**

4. Participate actively in discussions and activities

5. Listen deeply and build on peers' ideas

6. Practice new skills in simulations and role plays

7. Provide constructive peer feedback

**After Class:**

8. Consolidate learning via AI dialogue and reflection

9. Engage in forum discussions connecting theory to practice

10. Apply concepts to organizational contexts

**Throughout Semester:**

11. Submit quality assignments demonstrating critical analysis

12. Prepare systematically for class tests and examinations

---

# COURSE READINGS

### Core Textbooks

1. **Robbins, S. P., & Judge, T. A. (2021).** *Organizational Behavior* (18th ed.). Pearson.
2. **Yukl, G. (2012).** *Leadership in Organizations* (8th ed.). Pearson.
3. **McShane, S. L., & Von Glinow, M. A. (2021).** *Organizational Behavior* (9th ed.). McGraw Hill.
4. **Sharma, S. (2012).** *Management in the Gita*. Rupa Publications.
5. **Hackman, J. R. (2002).** *Leading Teams: Setting the Stage for Great Performances*. Harvard Business Review Press.

---

# WEEKLY SCHEDULE

---

# WEEK 1: FOUNDATIONS OF OB AND PROFESSIONAL IDENTITY

**Unit I | Topics:** Origins and evolution of OB, Positive Organizational Behavior, Personality (Big Five, MBTI), Self-concept and identity at work

**CLO Alignment:** CLO 1 (Comprehend foundations), CLO 2 (Analyze individual behavior)

### Before Class

• **Read:** Robbins & Judge Chapter 1 (What is OB?), Chapter 5 (Personality); Lawrence (1987); Luthans (2002)

• **AI Preparation Tasks:**

  • Explore: "What distinguishes organizational behavior from general psychology or management? Use Socratic dialogue to deepen my understanding."

  • Map: "Create a timeline showing OB's evolution from Hawthorne Studies to contemporary practice with AI-mediated work."

  • Apply: "Compare the Big Five personality model with your own self-perception. Which traits are strongest in you?"

  • Generate: "What are three questions I have about how personality affects organizational performance?"

### In Class

**Session 1 :**

• **Course Orientation and AI Companion Setup**

    - Welcome and course overview
    - Flipped learning model explanation
    - AI companion platform demonstration
    - Learning contract discussion
- **Opening Socratic Dialogue: "What is Organizational Behavior?"**
    - Large group exploration of OB concept
    - Distinguish OB from related fields
    - Capture student perspectives on board
- **Mini-Lecture: Foundations and Evolution of OB**
    - Historical origins: Hawthorne Studies, T-groups, behavioral science
    - Three levels of analysis: Individual, group, organizational
    - Contemporary challenges: AI, hybrid work, globalization
- **Transition**
    - Preview Session 2: Personality in organizations
    - Confirm pre-class AI tasks completed

**Session 2 :**

- **Positive Organizational Behavior**
    - Brief input: POB concepts (psychological capital, strengths-based approach)
    - Connection to Indian philosophy: Focus on potential vs. deficit
- **Personality Deep Dive**
    - Big Five model overview (OCEAN: Openness, Conscientiousness, Extraversion, Agreeableness, Neuroticism)
    - MBTI framework introduction
    - Personality-performance relationships
    - Small groups: Discuss personality assessment results from pre-class
- **Self-Assessment Activity**
    - Individual reflection: "How does my personality affect my work style?"
    - Pair-share insights
    - Connection to team effectiveness
- **Closure**
    - Key takeaways
    - Preview Session 3: Indian perspectives on personhood

**Session 3 :**

- **Indian Perspectives on Personhood**
  - **Trigunas framework:** Sattva (balance/purity), Rajas (activity/passion), Tamas (inertia/darkness)
  - Comparison with Big Five personality dimensions
  - **Purusharthas:** Dharma (duty), Artha (prosperity), Kama (desire), Moksha (liberation)
  - Connection to work motivation and values
  - **Karma theory:** Action, intention, consequences
  - Relevance to attribution and responsibility
- **Comparative Analysis Activity**
  - Small groups: Create Venn diagram comparing Western personality frameworks with Trigunas
  - Identify unique insights from each perspective
  - When would each framework be more useful?
- **Case Introduction: Indian Tech Startup Culture**
  - Brief case on personality diversity in startup team
  - Preview: Will analyze using both frameworks next week
- **Week Closure**
  - Reflective prompt: "What shifted in how you think about personality and behavior?"
  - Post-class AI tasks preview

### After Class

- **AI Consolidation:** "Synthesize key concepts from Week 1: How do personality theories (Western and Indian) explain workplace behavior? Create a study guide."
- **Forum Discussion:** "Share an example from your experience where personality significantly affected team dynamics or performance."
- **Preparation:** Read for Week 2 on perception and values

### Participation Opportunities

Opening dialogue contributions, self-assessment sharing, comparative analysis quality, case discussion preparation

---

# WEEK 2: PERCEPTION, VALUES, AND ATTITUDES

**Unit I | Topics:** Perception and attribution, Values and attitudes, AI impact on work behavior

**CLO Alignment:** CLO 1 (Comprehend AI impact), CLO 2 (Analyze perception effects)

## Before Class

- **Read:** Robbins & Judge Chapter 6 (Perception), Chapter 3 (Attitudes and Job Satisfaction)
- **AI Preparation Tasks:**
  - Explore: "Explain attribution theory using organizational examples. How do attributions affect manager-employee relationships?"
  - Map: "Create a visual showing how perception affects decision-making, hiring, performance evaluation."
  - Analyze: "How might AI systems (algorithmic management, surveillance) affect employee perception and attitudes?"
  - Question: "What are potential biases in my own perception of others' behavior?"

## In Class

### Session 1 :

- **Perception and Attribution Theory**
  - How we select, organize, interpret stimuli
  - Common perceptual biases: Halo effect, contrast effect, stereotyping
  - Attribution theory: Internal vs. external causation
  - Self-serving bias and fundamental attribution error
- **Perception Simulation Exercise**
  - Show ambiguous organizational scenario (video or written)
  - Students interpret individually
  - Small groups compare interpretations
  - Reveal how different attributions lead to different conclusions
- **Implications for Management**
  - Hiring decisions and interview bias
  - Performance appraisal errors
  - Interpersonal conflict from misattribution
- **Transition to Values**

### Session 2 :

- **Values and Value Systems**
  - Definition: Enduring beliefs about desirable modes of conduct
  - Schwartz's value dimensions: Conservation, self-enhancement, openness, self-transcendence
  - Generational value differences
- **Attitudes: Job Satisfaction and Organizational Commitment**

    - Components: Cognitive, affective, behavioral
    - Job satisfaction determinants
    - Organizational commitment types: Affective, continuance, normative
- **Values Audit Activity**
    - Personal values card sort exercise
    - Identify top 5 work values
    - Small groups: Discuss value alignment with organizational cultures
    - What happens when values misalign?
- **Link to Indian Philosophy**
    - Brief connection to Dharma (righteous values)
    - Preview: Motivation next week builds on values

**Session 3 :**

- **AI Impact on Work Behavior**
    - Algorithmic management: Surveillance, automated scheduling, performance tracking
    - How AI systems shape perception ("Am I being watched?")
    - Impact on psychological contract and trust
    - Ethical considerations in AI-mediated work
- **Case Discussion: Indian IT Services Firm**
    - Case on implementing AI-based productivity monitoring
    - Employee reactions and attitude changes
    - Small groups analyze using perception and attitude frameworks
    - Recommendations for ethical AI implementation
- **Large Group Synthesis**
    - Groups share insights (2 min each)
    - Facilitator synthesizes: Technology + human perception = organizational outcomes
- **Week Closure**
    - Integration: Personality (Week 1) + Perception (Week 2) = Understanding individual behavior
    - Preview Week 3: Integration and assessment

## After Class

- **AI Reflection:** "How have my own perceptual biases affected my judgments of others? Generate three scenarios to test my awareness."
- **Forum:** "Find a news article about AI in the workplace. Analyze employee reactions using attitude theory."

• **Prepare:** Review Units I concepts for Class Test 1

### Participation Opportunities

Simulation insights, values discussion depth, case analysis quality, AI ethics dialogue

---

# WEEK 3: UNIT I INTEGRATION AND ASSESSMENT

**Unit I Integration** | **Topics:** Synthesizing individual behavior concepts, self-concept, identity at work

**CLO Alignment:** CLO 1, CLO 2

## Before Class

• **Read:** Review Weeks 1-2 materials; Robbins & Judge Chapter 4 (Emotions and Moods - preview)

• **AI Preparation Tasks:**

  • Synthesize: "Create an integrated framework showing how personality, perception, values, and attitudes interact to shape workplace behavior."

  • Apply: "Analyze the Indian tech startup case from Week 1 using all Unit I concepts."

  • Practice: "Generate 3 application questions similar to what might appear on the class test."

## In Class

**Session 1:**

• **Self and Identity at Work**

  • Self-concept: How we see ourselves

  • Identity threats and identity work

  • Authentic self vs. professional persona

  • Impression management

• **Reflective Exercise: My Professional Identity**

  • Individual writing: "Who am I as a professional? What values guide me?"

  • Consider: Personality strengths, core values, how others perceive you

  • Pair-share key insights

• **Indian Context: The Concept of "Atman" and Work**

  • Brief input: Hindu philosophy of self

  • Contrast with Western individualism

    - Implications for workplace identity in Indian organizations
- **Transition**
    - Preview integrative case discussion

**Session 2 :**

- **Comprehensive Case Analysis: Infosys Culture Transformation**
    - Distribute 3-page case on Infosys cultural evolution
    - Students read (10 minutes)
    - Small groups (5-6 students) analyze using Unit I frameworks:
        - How did personality diversity affect transformation?
        - What perceptual challenges emerged?
        - How did value conflicts surface?
        - What role did identity play?
- **Group Presentations**
    - 4-5 groups present analyses (4 minutes each)
    - Peer questions after each presentation
    - Identify common themes
- **Synthesis**
    - Facilitator highlights excellent applications of theory
    - Integration: All Unit I concepts work together to explain organizational behavior

**Session 3 :**

- **Unit I Integration Discussion**
    - Socratic dialogue: "What are the most important insights about individual behavior from Unit I?"
    - "How do Western and Indian perspectives complement each other?"
    - "What's still confusing or unclear?"
- **CLASS TEST 1 (15 minutes)**
    - **Format:** 2 questions × 2 marks = 4 marks
    - **Bridge to Unit II**
    - From understanding behavior → Understanding motivation
    - Preview: Motivation theories next week

## After Class

- **AI Consolidation:** "Summarize all Unit I concepts in a 2-page study guide. Include definitions, key theories, and application examples."

• **Forum:** "Reflect on the test: What was challenging? What do you want to explore further about individual behavior?"

• **Prepare:** Read motivation theories for Week 4

### Participation Opportunities

Identity reflection sharing, case analysis sophistication, integration discussion contributions, test performance

📝 **ASSESSMENT:** Class Test 1 (Week 3, Session 3) - 4 marks

---

# WEEK 4: MOTIVATION THEORIES - CONTENT AND PROCESS

**Unit II** | **Topics:** Content theories (Maslow, Herzberg, Alderfer, McClelland), Process theories (Expectancy, Equity, Goal-setting, Self-determination)

**CLO Alignment:** CLO 2 (Analyze motivation impact), CLO 5 (Create motivational strategies)

## Before Class

• **Read:** Robbins & Judge Chapter 7 (Motivation Concepts), Chapter 8 (Motivation: Applications); Herzberg (1968)

• **AI Preparation Tasks:**

  • Map: "Create visual comparison of content theories (Maslow, Herzberg, Alderfer, McClelland). What are similarities and differences?"

  • Explore: "Use Socratic dialogue to understand: Why do process theories (Expectancy, Equity, Goal-setting) focus on 'how' rather than 'what' motivates?"

  • Apply: "Analyze low motivation in a hypothetical Indian manufacturing firm using 2-3 theories."

  • Question: "Which motivation theory resonates most with your personal experience? Why?"

## In Class

### Session 1 :

• **Motivation Overview**

  • Definition: Intensity, direction, persistence of effort

  • Why motivation matters: Performance, satisfaction, retention

  • Content vs. Process theories distinction

• **Content Theories Deep Dive**

- **Maslow's Hierarchy of Needs:** Physiological → Safety → Social → Esteem → Self-actualization
- **Herzberg's Two-Factor Theory:** Hygiene factors vs. Motivators
- **Alderfer's ERG Theory:** Existence, Relatedness, Growth (frustration-regression)
- **McClelland's Three Needs:** Achievement, Affiliation, Power
- For each: Core idea, organizational application, limitations

- **Quick Application**
  - Poll: "Which theory explains your own work motivation best?"
  - Brief discussion of results
- **Transition**
  - Preview: Process theories tomorrow

**Session 2 :**

- **Process Theories Explained**
  - **Expectancy Theory (Vroom):** Effort → Performance → Outcome, and valence
  - **Equity Theory (Adams):** Inputs/Outcomes ratio, social comparison, perceived fairness
  - **Goal-Setting Theory (Locke & Latham):** Specific, challenging goals; feedback; commitment
  - **Self-Determination Theory (Deci & Ryan):** Intrinsic vs. extrinsic; autonomy, competence, relatedness
  - For each: Practical implications, managerial applications
- **Jigsaw Activity: Theory Experts**
  - Divide class into 4 sections (Expectancy, Equity, Goal-setting, Self-determination)
  - Expert groups deepen understanding (15 minutes)
  - Mixed groups apply all four theories to same case scenario (15 minutes)
- **Synthesis**
  - "Which process theory is most actionable for managers?"
  - "How do process theories complement content theories?"

**Session 3 :**

- **Case Discussion: Motivation Crisis in Indian IT Services**
  - Distribute 2-page case: High attrition, low engagement, burnout
  - Small groups diagnose using multiple motivation theories:
    - Which needs are unmet? (Content)
    - What expectancies, equity perceptions, goal issues? (Process)
  - Design intervention recommendations

- **Group Presentations and Peer Feedback**
  - 4-5 groups present diagnoses and recommendations (4 min each)
  - Peer questions and constructive feedback
  - Identify best practices across groups
- **Integration and Preview**
  - Motivation is multi-dimensional; no single theory sufficient
  - Next week: Indian perspectives and meaning of work
  - Preview Assignment 1

### After Class

• **AI Practice:** "Generate 5 workplace scenarios. For each, identify which motivation theory best explains the behavior and why."

• **Forum:** "Share an example of when you felt highly motivated at work/school. Analyze it using one content and one process theory."

• **Prepare:** Read on Nishkama Karma and meaning of work

### Participation Opportunities

Jigsaw expertise, case diagnosis quality, presentation clarity, peer feedback constructiveness

---

## WEEK 5: INDIAN PERSPECTIVES ON MOTIVATION AND MEANING OF WORK

**Unit II** | **Topics:** Nishkama Karma, Lokasangraha, Meaning of work, Emotions and emotional intelligence

**CLO Alignment:** CLO 2 (Analyze motivation), CLO 5 (Create strategies integrating Indian perspectives)

### Before Class

• **Read:** Sharma (2012) Chapter 3 (Karma Yoga); Robbins & Judge Chapter 4 (Emotions); Goleman (1998)

• **AI Preparation Tasks:**

  • Explore: "What is Nishkama Karma (desireless action)? How does it differ from Western achievement motivation?"

  • Compare: "Create a table contrasting intrinsic motivation (Self-Determination Theory) with Nishkama Karma."

- Reflect: "What gives work 'meaning' for you personally? Is it outcomes, process, service to others?"
- Map: "Visualize the components of emotional intelligence and their workplace applications."

## In Class

### Session 1 :

- **Indian Perspectives on Motivation**
  - **Nishkama Karma (Bhagavad Gita, Chapter 3):**
    - Action without attachment to outcomes
    - Focus on dharma (duty) and process, not rewards
    - How it relates to intrinsic motivation and flow
  - **Lokasangraha:**
    - Welfare of all; service orientation
    - Contrast with individual achievement orientation
    - Application in Indian organizations
- **0:25-0:45 | Comparative Analysis Activity**
  - Pairs: Compare Nishkama Karma with one Western motivation theory
  - Create 2-column comparison: Similarities, Differences, When each perspective is more useful
  - Volunteer pairs share insights
- **Meaning of Work Discussion**
  - Socratic dialogue: "What makes work meaningful?"
  - Connect to: Job Characteristics Model (meaningfulness), Purpose-driven work
  - Indian context: Work as yajna (sacrifice/offering), seva (service)
- **Transition**
  - From motivation to emotions

### Session 2 :

- **0:00-0:20 | Emotions at Work**
  - Affective Events Theory: Events → Emotional reactions → Attitudes and behaviors
  - Mood vs. emotions distinction
  - Emotional labor: Surface acting vs. deep acting
  - Emotional contagion in teams
- **0:20-0:45 | Emotional Intelligence (EI) Deep Dive**
  - Goleman's model: Self-awareness, Self-regulation, Motivation, Empathy, Social skills

    - EI and leadership effectiveness
    - EI and job performance relationships
    - Can EI be developed?
- **EI Self-Assessment Activity**
    - Individual reflection using EI framework:
        - Which EI components are my strengths?
        - Which need development?
    - Pair-share and goal-setting
- **Preview**
    - Technology-mediated emotions tomorrow

**Session 3 :**

- **0:00-0:20 | Technology-Mediated Emotions**
    - Emotions in virtual teams: Lack of nonverbal cues
    - Digital exhaustion and Zoom fatigue
    - Asynchronous communication and emotional misunderstanding
    - Strategies for emotional connection in hybrid work
- **0:20-0:40 | Role Play: Managing Emotions in Difficult Conversations**
    - Scenario: Manager giving critical feedback remotely
    - Pairs role-play: Manager and employee
    - Apply EI principles: Self-awareness, empathy, regulation
    - Observer notes what works
- **0:40-0:55 | Debrief and Synthesis**
    - What made emotionally intelligent communication effective?
    - Challenges in virtual vs. in-person emotional management
    - Connection to motivation: Emotions drive behavior
- **Assignment 1 Announcement**
    - **Due:** End of Week 5
    - **Task:** Individual Behavior Analysis using Bharat Textiles Dataset
    - **Details:** 800-1000 words + Excel analysis
    - Review rubric and submission process

## After Class

- **AI Dialogue:** "Explore this dilemma: Can Nishkama Karma work in profit-driven organizations? What would it look like in practice?"

• **Forum:** "Share an example of emotionally intelligent leadership you've observed. What specific EI competencies were demonstrated?"

• **Complete Assignment 1:** Analyze patterns in personality, motivation, job satisfaction using dataset

### Participation Opportunities

Comparative analysis insights, meaning of work contributions, EI reflection depth, role play engagement

📝 **ASSESSMENT:** Assignment 1 due (Week 5, End of Week) - 6 marks

---

# WEEK 6: GROUP DYNAMICS AND TEAM STRUCTURES

**Unit III** | **Topics:** Group formation and development, Cohesiveness and productivity, Agile teams and self-managing teams

**CLO Alignment:** CLO 3 (Interpret team dynamics), CLO 5 (Create team interventions)

## Before Class

• **Read:** Robbins & Judge Chapter 9 (Foundations of Group Behavior), Chapter 10 (Understanding Work Teams); Hackman (2002) Chapter 2

• **AI Preparation Tasks:**

  • Map: "Visualize Tuckman's stages of group development (Forming-Storming-Norming-Performing-Adjourning) with organizational examples."

  • Explore: "What factors increase group cohesiveness? When does high cohesiveness hurt performance?"

  • Compare: "How do self-managing teams differ from traditional teams? What are benefits and challenges?"

  • Design: "Create a charter for an effective team including roles, norms, decision-making process."

## In Class

### Session 1 :

• **Foundations of Group Behavior**

  • Formal vs. informal groups

  • Why people join groups: Security, status, esteem, affiliation, power, goal achievement

  • Punctuated equilibrium model

    - **Tuckman's Stages:** Forming (uncertainty) → Storming (conflict) → Norming (cohesion) → Performing (functional) → Adjourning (wrap-up)
- **Group Structure Elements**
    - Roles: Task roles, relationship roles, dysfunctional roles
    - Norms: How they form, conformity pressure
    - Status systems: Formal vs. informal status
    - Size effects: Social loafing in larger groups
- **Quick Activity: Norm Awareness**
    - Small groups: Identify implicit norms in this class
    - What happens when norms are violated?
    - How do norms develop?
- **Transition**
    - Tomorrow: Cohesiveness and team types

### Session 2 :

- **Cohesiveness and Productivity**
    - Definition: Degree members attracted to group and motivated to remain
    - Sources of cohesiveness: Similarity, small size, success, external threats
    - **Cohesiveness-Performance Relationship:**
        - High cohesion + alignment with org goals = High performance
        - High cohesion + misalignment = Low performance (strong but wrong direction)
    - **Groupthink (Janis):** Illusion of invulnerability, pressure on dissenters, mindguards
- **Modern Team Structures**
    - **Agile Teams:**
        - Self-organizing, cross-functional
        - Iterative work (sprints), daily stand-ups
        - Retrospectives and continuous improvement
    - **Self-Managing Teams:**
        - High autonomy over work process
        - Collective accountability
        - Requires high maturity and trust
    - When these structures work best vs. traditional hierarchical teams
- **Case Discussion: Indian IT Company Agile Transformation**
    - Brief case on transition challenges
    - Small groups: What helped? What hindered?

- **Preview**
  - Team simulation tomorrow

**Session 3 :**

- **Team Simulation Setup**
  - Task: Build tallest paper tower (15 minutes)
  - Teams of 6-7 students with role constraints:
    - Observer (can't touch materials, only observe)
    - Builder (can build, but cannot speak)
    - Designer (can draw/plan, cannot build)
    - Resource manager (distributes materials, timekeeps)
    - Facilitator (only person who can communicate between designer and builder)
- **Simulation Execution**
  - Teams work (15 minutes)
  - Facilitator observes: Communication patterns, conflict handling, role adherence
- **Structured Debrief**
  - Within teams (7 minutes): "How did that feel? What worked? What didn't?"
  - Observers share observations
  - Whole class (8 minutes): "What team dynamics emerged? How did constraints affect collaboration?"
- **Connect to Theory**
  - Map simulation to Tuckman's stages (compressed)
  - Role clarity importance
  - Communication challenges
  - Psychological safety and risk-taking
- **CLASS TEST 2 (10 minutes + 5 min debrief)**
  - **Format:** 2 questions × 2 marks = 4 marks
  - **Question 1 (2 marks):** "Apply Nishkama Karma concept to explain motivation in this scenario..." [Brief scenario]
  - **Question 2 (2 marks):** "Diagnose the team's group development stage and recommend interventions..." [Brief team scenario]

## After Class

- **AI Reflection:** "Reflect on the team simulation. Which stage did your team reach? What would have helped you progress further?"
- **Forum:** "Find an example of a self-managing team (from news, case study, or your experience).

What made it succeed or struggle?"

• **Prepare:** Read on virtual teams and group decision-making

### Participation Opportunities

Simulation engagement, debrief insights, theory application, case analysis

📝 **ASSESSMENT:** Class Test 2 (Week 6, Session 3) - 4 marks

---

# WEEK 7: VIRTUAL TEAMS AND GROUP DECISION-MAKING

**Unit III** | **Topics:** Virtual teams, Group decision-making processes, Technology and collaboration

**CLO Alignment:** CLO 3 (Interpret team dynamics, evaluate strategies)

## Before Class

• **Read:** Robbins & Judge Chapter 9 (Group Decision-Making section); articles on virtual teams

• **AI Preparation Tasks:**

  • Explore: "What are unique challenges of virtual teams compared to co-located teams? How can trust be built remotely?"

  • Map: "Create a decision tree showing different group decision-making methods (consensus, voting, delegation) and when to use each."

  • Analyze: "How does technology (Zoom, Slack, collaboration tools) affect team dynamics and communication?"

  • Design: "Draft ground rules for effective virtual team meetings."

## In Class

### Session 1 :

- **Virtual Teams in Depth**
  - Defining characteristics: Geographically dispersed, technology-mediated
  - Benefits: Access to talent, flexibility, cost savings
  - Challenges:
    - Communication: Lack of nonverbal cues, asynchronous delays
    - Trust-building: Harder without face-to-face interaction

    - Coordination: Time zones, cultural differences
    - Team cohesion: Weaker social connections
  - Strategies for effectiveness:
    - Rich media for complex tasks
    - Regular video check-ins (not just email)
    - Clear norms and expectations
    - Intentional relationship-building activities
- **Virtual Team Simulation**
  - Teams communicate ONLY via text chat (no speaking)
  - Task: Make a complex decision (e.g., hire candidate from descriptions)
  - 15 minutes to decide
  - Experience: Frustration, misunderstanding, coordination difficulty
- **Debrief**
  - "What was challenging?"
  - "How did lack of audio/video affect your process?"
  - Connect to real virtual team challenges
- **Transition to decision-making

### Session 2 :

- **Group Decision-Making Processes**
  - **Methods:**
    - Consensus: All agree; time-intensive but high buy-in
    - Voting: Majority rule; faster but creates winners/losers
    - Consultative: Leader decides after input
    - Delegation: Empower subgroup
  - When to use each method
  - **Common Pitfalls:**
    - Groupthink (revisited)
    - Risky shift vs. cautious shift
    - Domination by vocal members
    - Satisficing vs. optimizing
- **Decision-Making Techniques**
  - **Brainstorming:** Generate ideas without judgment
  - **Nominal Group Technique:** Write ideas, round-robin sharing, vote

    - **Delphi Technique:** Anonymous expert opinions, iterate
    - **Devil's Advocacy:** Assign critic role
    - Demonstration of nominal group technique
- **Practice: Decision-Making Methods**
    - Scenario: Team must decide how to allocate limited budget
    - Groups try different methods (assigned)
    - Compare: Which method worked best for this scenario? Why?
- **Synthesis**
    - No one "best" decision method; context matters
    - Preview: Conflict tomorrow

**Session 3 :**

- **Managing Organizational Conflict**
    - Sources: Task conflict, relationship conflict, process conflict
    - **Functional conflict:** Stimulates creativity, challenges status quo
    - **Dysfunctional conflict:** Reduces productivity, lowers morale
    - **Thomas-Kilmann Conflict Modes:**
        - Competing (assertive, uncooperative)
        - Accommodating (unassertive, cooperative)
        - Avoiding (unassertive, uncooperative)
        - Compromising (moderate on both)
        - Collaborating (assertive, cooperative)
    - When to use each mode
- **Conflict Resolution Role Plays**
    - Pairs: Role-play conflicts using different modes
    - Scenario 1: Team members disagree on project approach
    - Scenario 2: Resource allocation dispute between departments
    - Practice: Competing, then collaborating
    - Compare effectiveness
- **Case: Conflict in Indian Manufacturing Firm**
    - Brief case on inter-departmental conflict
    - Small groups: Diagnose conflict type and recommend resolution strategy
    - Quick sharing
- **Week Closure**

- Integration: Virtual teams + Decision-making + Conflict = Comprehensive team management
- Preview Week 8: Managing misbehavior

### After Class

• **AI Practice:** "Generate 3 organizational conflict scenarios. For each, identify the best conflict mode and explain why."

• **Forum:** "Reflect on a virtual team experience (positive or negative). What made it work or not work?"

• **Prepare:** Read on organizational misbehavior and deviance

### Participation Opportunities

Virtual simulation engagement, decision-making practice, role play quality, case recommendations

---

## WEEK 8: MANAGING MISBEHAVIOR AND UNIT III INTEGRATION

**Unit III** | **Topics:** Counterproductive work behavior, Workplace deviance and incivility, Integrating team concepts

**CLO Alignment:** CLO 3 (Evaluate strategies for managing misbehavior)

### Before Class

• **Read:** Robbins & Judge Chapter 9 (Deviance section); supplementary article on workplace incivility

• **AI Preparation Tasks:**

- Explore: "What is counterproductive work behavior? What causes employees to engage in deviance or sabotage?"
- Categorize: "Create a typology of misbehavior: Minor vs. serious, individual vs. group, targeted vs. general."
- Analyze: "How can organizations prevent misbehavior without creating toxic surveillance culture?"
- Synthesize: "Create an integrated model connecting all Unit III concepts: groups, teams, virtual, decisions, conflict, misbehavior."

### In Class

**Session 1 :**

- **Understanding Organizational Misbehavior**
  - **Types:**
    - Production deviance: Leaving early, taking long breaks, wasting resources
    - Property deviance: Theft, sabotage
    - Political deviance: Gossiping, favoritism, blaming others
    - Personal aggression: Harassment, verbal abuse
  - **Causes:**
    - Perceived injustice or unfair treatment
    - Poor leadership or toxic culture
    - Frustration with organizational constraints
    - Peer influence and group norms
    - Individual predispositions (low self-control, Machiavellianism)
- **Workplace Incivility**
  - Low-intensity deviant behaviors: Rudeness, disrespect, ignoring
  - Incivility spiral: Small acts escalate
  - Impact: Stress, reduced performance, turnover
  - Psychological safety revisited: How it prevents misbehavior
- **Prevention and Response Strategies**
  - **Prevention:**
    - Fair policies and transparent processes
    - Effective leadership and role modeling
    - Psychological safety and voice mechanisms
    - Clear behavioral expectations
  - **Response:**
    - Progressive discipline
    - Restorative justice approaches
    - Address root causes, not just symptoms
  - Discussion: "What's the balance between control and trust?"
- **Transition**
  - Tomorrow: Comprehensive case integration

**Session 2 :**

- **Case Study: Team Dysfunction in Indian Organization**
  - Distribute 3-page case involving:

        - Low cohesion and infighting
        - Poor virtual collaboration
        - Decision-making paralysis
        - Conflict escalation
        - Some deviant behaviors emerging
    - Students read (10 minutes)
    - Small groups analyze comprehensively (20 minutes):
        - Diagnose using all Unit III frameworks
        - What's happening at individual, group, and organizational levels?
        - Root causes vs. symptoms
        - Recommendations
- **Group Presentations**
    - 5-6 groups present diagnoses (4 minutes each)
    - Peer questions and feedback
    - Compare approaches
- **Facilitator Synthesis**
    - Highlight sophisticated analyses
    - Connect to theories explicitly
    - Preview: Power and leadership next

**Session 3 :**

- **Unit III Integration Workshop**
    - Small groups create visual framework integrating:
        - Group development stages
        - Team types (virtual, agile, self-managing)
        - Decision-making processes
        - Conflict management
        - Misbehavior prevention
    - Show relationships and interdependencies
    - Prepare 3-minute presentation
- **Gallery Walk and Peer Feedback**
    - Groups post frameworks
    - Students circulate, read, provide sticky note feedback
    - Vote on most comprehensive framework

- **Week Closure and Bridge**
  - Synthesis: Team effectiveness requires attention to multiple dimensions
  - Preview Week 9: Power and leadership
  - Announce Assignment 2 details

### After Class

• **AI Consolidation:** "Create a 2-page Unit III study guide synthesizing all concepts with examples."

• **Forum:** "What's the most important insight you gained about team dynamics from Unit III?"

• **Prepare:** Read on power and influence for Week 9

• **Note:** Assignment 2 details announced

### Participation Opportunities

Misbehavior discussion depth, case analysis sophistication, integration framework creativity, peer feedback quality

📌 **Assignment 2 Announced:** Leadership Case Analysis and Organizational Assessment (6 marks, due Week 10)

---

## WEEK 9: POWER, INFLUENCE, AND LEADERSHIP THEORIES

**Unit IV | Topics:** Bases of power, Influence tactics, Leadership theories (Trait, Behavioral, Contingency, Transformational)

**CLO Alignment:** CLO 4 (Evaluate leadership styles), CLO 5 (Create leadership strategies)

### Before Class

• **Read:** Robbins & Judge Chapter 13 (Power and Politics), Chapter 12 (Leadership); Yukl (2012) Chapters 1-3

• **AI Preparation Tasks:**

  • Map: "Visualize French & Raven's five bases of power with organizational examples for each."

  • Explore: "Compare influence tactics: When is rational persuasion more effective than coalition building?"

  • Synthesize: "Create a timeline of leadership theory evolution: Trait → Behavioral → Contingency → Transformational."

  • Reflect: "What's your personal leadership style based on theories you've learned?"

## In Class

### Session 1 :

- **Power in Organizations**
  - Definition: Capacity to influence others' behavior
  - **French & Raven's Five Bases:**
    - Coercive: Power to punish
    - Reward: Power to give benefits
    - Legitimate: Power from position
    - Expert: Power from knowledge
    - Referent: Power from respect/admiration
  - **Additional bases:** Information power, connection power
  - Power vs. authority distinction
  - Dependency theory of power: A has power over B when B depends on A
- **Influence Tactics**
  - **Kipnis et al. taxonomy:**
    - Rational persuasion, Consultation, Ingratiation
    - Pressure, Exchange, Coalition building
    - Legitimating, Personal appeals, Inspirational appeals
  - Effectiveness varies by:
    - Target (upward, downward, lateral)
    - Culture (individualist vs. collectivist)
    - Situation
  - **Organizational Politics:** Self-serving use of power; political skill
- **Activity: Power and Influence Analysis**
  - Scenario: Mid-level manager trying to implement change
  - Individual: Identify power bases available and best influence tactics
  - Pair-share recommendations
- **Transition**
  - From power to leadership

### Session 2 :

- **Leadership Theories Overview**
  - Leadership vs. management distinction

- Evolution: Trait → Behavior → Contingency → Contemporary

•**Leadership Theory Deep Dive Trait Theories (5 min): Behavioral Theories (10 min): Contingency Theories (20 min):**

- Great person theories: Leaders born with special traits
- Big Five personality correlations (especially extraversion, conscientiousness)
- Emotional intelligence and leadership
- Limitations: Context matters, traits insufficient
- Ohio State Studies: Initiating structure vs. consideration
- Michigan Studies: Production-oriented vs. employee-oriented
- Blake & Mouton's Managerial Grid: Concern for people vs. production
- Implication: Leadership can be learned
- **Fiedler's Model:** Leadership style (task vs. relationship) + situational favorability
- **Hersey-Blanchard Situational Leadership:** Match style to follower readiness (directing, coaching, supporting, delegating)
- **Path-Goal Theory (House):** Leader clarifies path to goals; styles (directive, supportive, participative, achievement-oriented)
- **Leader-Member Exchange (LMX):** In-group vs. out-group relationships
- Key insight: No one best leadership style; depends on situation

- **Quick Check**
  - Poll: "Which theory resonates most with your understanding of leadership?"
  - Brief discussion

**Session 3 :**

- **Transformational and Contemporary Leadership**
  - **Transformational Leadership (Bass & Avolio):**
    - Idealized influence (charisma)
    - Inspirational motivation (vision)
    - Intellectual stimulation (creativity)
    - Individualized consideration (coaching)
  - Contrast with transactional leadership (contingent rewards, management by exception)
  - **Servant Leadership (Greenleaf):** Leader as servant first
  - **Authentic Leadership:** Self-awareness, transparency, ethical
- **Leadership Style Self-Assessment**
  - Brief assessment: Identify your dominant style
  - Reflection: Strengths and areas for development

  - Small groups: Share insights, discuss situational appropriateness
- **Leadership in Hybrid Organizations**
  - E-leadership challenges: Virtual influence, digital communication
  - Distributed leadership in agile teams
  - Leadership in the age of AI: Human + machine collaboration
- **CLASS TEST 3 Announcement**
  - Next week during Session 3
  - Preview: Compare transformational leadership with Krishna's approach

### After Class

- **AI Exploration:** "Compare transformational leadership with servant leadership. When would each be more effective in Indian organizational contexts?"
- **Forum:** "Analyze a leader you admire (real or historical). Which leadership theories best explain their effectiveness?"
- **Prepare:** Read on cross-cultural leadership and indigenous models

### Participation Opportunities

Power analysis quality, theory discussions, self-assessment sharing, hybrid leadership insights

---

## WEEK 10: INDIGENOUS LEADERSHIP MODELS AND COURSE INTEGRATION

**Unit IV** | **Topics:** Cross-cultural leadership, Ethical and spiritual leadership, Krishna as strategist, Rama as moral exemplar, Chanakya's principles

**CLO Alignment:** CLO 4, CLO 5 (Evaluate and create leadership strategies integrating indigenous wisdom)

### Before Class

- **Read:** Sharma (2012) Chapters on Krishna and Rama; Yukl (2012) Chapter on Ethics; supplementary readings on Chanakya
- **AI Preparation Tasks:**
  - Explore: "Analyze Krishna's leadership in Bhagavad Gita: What situational wisdom did he demonstrate?"
  - Compare: "How does Rama's dharmic leadership differ from Western ethical leadership models?"

- Map: "Create a framework integrating Chanakya's seven elements of governance with modern organizational leadership."
- Synthesize: "Design an integrated leadership model combining Western theories with Indian philosophical wisdom."

## In Class

### Session 1 :

- **Indigenous Leadership Models: Philosophical Foundations Krishna as Strategist (Bhagavad Gita, Mahabharata): Rama as Moral Exemplar (Ramayana): Chanakya's Principles (Arthashastra):**
  - Situational wisdom: Different strategies for different contexts
  - Ethical dilemmas: When duty conflicts with compassion
  - Karma Yoga in leadership: Act without attachment to results
  - Modern application: Strategic flexibility, ethical complexity
  - Dharmic leadership: Righteousness even at personal cost
  - Leading by example
  - Sacrifice for greater good
  - Modern application: Integrity, stakeholder trust
  - Saptanga theory: Seven elements of organizational governance
  - Pragmatic statecraft and strategic thinking
  - Balance between ethics and realpolitik
  - Modern application: Strategic leadership, organizational architecture
- **Comparative Analysis Activity**
  - Small groups: Compare one indigenous model with one Western theory
  - Create Venn diagram showing:
    - Unique insights from each
    - Areas of overlap
    - When each is more applicable
  - Prepare 3-minute presentation
- **Group Presentations**
  - 3-4 groups share comparisons (3 min each)
  - Class discussion: Can these be integrated?
- **Transition**
  - Tomorrow: Cross-cultural and ethical leadership

**Session 2 :**

- **Cross-Cultural Leadership**
  - **GLOBE Study findings:** Cultural dimensions affect leadership effectiveness
  - Culture-contingent attributes: What works in collectivist vs. individualist cultures
  - Universally positive attributes: Integrity, vision
  - Culturally contingent: Autonomy, risk-taking, self-sacrifice
  - Leading in multicultural teams: Cultural intelligence needed
- **Ethical and Spiritual Leadership**
  - **Ethical Leadership:** Moral person + moral manager
    - Integrity, fairness, care for stakeholders
    - Role modeling and accountability
  - **Spiritual Leadership:** Meaning, calling, membership
    - Vision of service, altruistic love, hope/faith
    - Inner life and outer action alignment
  - Connection to Indian philosophy: Dharma, seva, atman
  - Case discussion: Ethical dilemma for leader
- **Integration Discussion**
  - "How do indigenous models enrich global leadership understanding?"
  - "What's culturally universal vs. culturally specific in leadership?"

**Session 3 :**

- **Case Study: Contemporary Indian Leader**
  - Brief case on transformational leader in Indian organization (e.g., Narayana Murthy, Kiran Mazumdar-Shaw, Azim Premji)
  - Small groups analyze using:
    - Western leadership theories
    - Indigenous leadership models
  - Which frameworks explain effectiveness best?
- **CLASS TEST 3 (15 minutes)**
  - **Format:** 2 questions × 2 marks = 4 marks
  - **Question 1 (2 marks):** "Compare transformational leadership with Krishna's situational leadership approach using this scenario..."
  - **Question 2 (2 marks):** "Identify power bases and influence tactics in this organizational scenario; recommend ethical approach..."
- **Test Debrief**

  - Review answers
  - Clarify any confusion
- **Course Integration: OB to Leadership**
  - Full circle: Individual behavior (Units I-II) → Team behavior (Unit III) → Leadership (Unit IV)
  - How leaders shape individual motivation, team dynamics, organizational culture
  - Socratic dialogue: "What are your biggest takeaways from this course?"
- **Course Closure**
  - Assignment 2 due reminder
  - End-term exam preparation guidance
  - Office hours availability
  - Thank you and appreciations
  - Final reflections

### After Class

- **Complete Assignment 2:** Leadership Case Analysis (due end of week)
- **AI Exam Prep:** "Generate 5 practice exam questions covering all four units. Provide model answers."
- **Forum:** "Final reflection: How has this course changed your understanding of OB and leadership?"
- **Form Study Groups:** Prepare systematically for end-term

### Participation Opportunities

Comparative analysis depth, case discussion, integration dialogue, final reflections

📝 **ASSESSMENT:**

- Class Test 3 (Week 10, Session 3) - 4 marks
- Assignment 2 due (Week 10, End of Week) - 6 marks

---

# PARTICIPATION AND ENGAGEMENT

Active participation is essential for success. Participation is tracked through:

1. **Quality of class discussion contributions** - Insightful questions, building on others' ideas
2. **Group facilitation and collaboration** - Leadership in activities, supporting peers
3. **Thoughtful questions posed** - Probing deeper, making connections
4. **Peer feedback quality** - Constructive, specific, helpful

5. **Online forum engagement** - Substantive posts connecting theory to practice

### Tips for Meaningful Participation

• Come prepared having completed pre-class work

• Listen actively before contributing

• Build on peers' ideas rather than just stating your own

• Ask clarifying questions when confused

• Share relevant examples from experience or context

• Provide constructive, specific feedback to group members

• Engage authentically, not performatively

---

## EXAMINATION PREPARATION

### End-Term Examination Format

• **Duration:** 3 hours

• **Total Marks:** 90

• **Structure:**

  • Questions 1-4: 20 marks each (with internal choice - attempt 1 from 2 options)

  • Question 5: 10 marks (with internal choice)

### Question Types Expected

1. **Case-based application:** Apply OB/leadership frameworks to organizational scenarios

2. **Comparative analysis:** Compare theories (e.g., Maslow vs. Nishkama Karma, Transformational vs. Krishna's leadership)

3. **Critical evaluation:** Assess theories, interventions, or leadership styles for effectiveness and cultural appropriateness

4. **Integrative synthesis:** Connect concepts across multiple units

### Examination Tips

1. Questions test application, analysis, and evaluation (not just recall)

2. Expect case-based questions requiring framework application

3. Integrate Indian context examples in your answers

4. Practice answer structuring:

  • **Introduction:** Define key concepts clearly

  • **Analysis:** Apply frameworks systematically with reasoning

- **Examples:** Use Indian organizational contexts
- **Conclusion:** Synthesize insights and offer recommendations

5. Use AI companion for practice questions throughout semester
6. Form study groups to discuss concepts and practice answers

### Key Areas to Focus

• **Unit I:** Personality (Big Five, Trigunas), Perception and attribution, Values and attitudes, AI impact

• **Unit II:** Motivation theories (content and process), Nishkama Karma, Emotional intelligence

• **Unit III:** Group development, Team types, Virtual teams, Decision-making, Conflict management

• **Unit IV:** Power and influence, Leadership theories (all), Indigenous models, Cross-cultural leadership

---

## SYLLABUS AT-A-GLANCE

| Week | Unit | Topics | Key Frameworks | Assessment |
|---|---|---|---|---|
| 1 | I | OB Foundations, Personality, Identity | Big Five, POB, Trigunas | - |
| 2 | I | Perception, Values, AI Impact | Attribution, Schwartz Values | - |
| 3 | I | Unit I Integration, Self-Concept | Synthesis | Test 1 (4 marks) |
| 4 | II | Motivation: Content & Process Theories | Maslow, Herzberg, Expectancy, Equity | - |

| | | | | |
|---|---|---|---|---|
| 5 | II | Indian Perspectives, Emotions, EI | Nishkama Karma, Goleman EI | Assignment 1 (6 marks) |
| 6 | III | Group Dynamics, Team Types | Tuckman, Agile Teams | Test 2 (4 marks) |
| 7 | III | Virtual Teams, Decision-Making, Conflict | Conflict Modes, NGT | - |
| 8 | III | Misbehavior, Unit III Integration | Deviance, Synthesis | Assignment 2 announced |
| 9 | IV | Power, Influence, Leadership Theories | French & Raven, Transformational | - |
| 10 | IV | Indigenous Models, Cross-Cultural, Ethics | Krishna, Rama, Chanakya, GLOBE | Test 3 (4 marks), Assignment 2 (6 marks) |

---

# ASSESSMENT STRUCTURE AND CRITERIA

## Assessment Components Overview

| Component | Marks | CLO Alignment | Evaluation Focus |
|---|---|---|---|

| | | | |
|---|---|---|---|
| End-Term Examination | 90 | CLO 1-5 | Comprehensive understanding, application, analysis |
| Attendance | 6 | - | DU Rule |
| Assignments | 12 | CLO 2, 3, 4, 5 | Application, reflection, analysis |
| Class Tests | 12 | CLO 1, 2, 3, 4 | Framework application, analytical thinking |
| **TOTAL** | **120** | | |

---

## 1. End-Term Examination (90 marks)

**Format:** Five questions with internal choice

• Questions 1-4: 20 marks each (choose 1 from 2 options)

• Question 5: 10 marks (choose 1 from 2 options)

**Question Types:**

• **Case-based application:** Apply diagnostic frameworks or OB theories to organizational scenarios

• **Comparative analysis:** Compare and evaluate different OB theories or leadership models

• **Critical evaluation:** Assess ethical dimensions, cultural appropriateness, or effectiveness of approaches

• **Integrative synthesis:** Connect concepts across multiple units

**Evaluation Criteria:**

• **Conceptual accuracy (30%):** Correct understanding and definition of theories/frameworks

• **Application depth (35%):** Appropriate application to cases with clear reasoning

• **Critical analysis (20%):** Evidence of evaluative thinking beyond description

• **Integration & examples (15%):** Connecting concepts; using Indian organizational contexts

**Answer Structure Expected:**

1. **Introduction:** Define key concepts, state approach
2. **Analysis:** Apply frameworks systematically with evidence
3. **Examples:** Indian organizational contexts demonstrating points
4. **Conclusion:** Synthesize insights, offer recommendations

---

## 2. Assignments (12 marks total)

**Assignment 1 (Week 5, 6 marks): Individual Behavior Analysis Using Bharat Textiles Data**

• **Word Count:** 800-1000 words (narrative) + Excel workbook

• **CLO Alignment:** CLO 2, CLO 5

• **Focus:** Analyze patterns in personality, motivation, job satisfaction, and performance using organizational dataset

**Requirements:**

1. **Excel Analysis Component** (Submit .xlsx file):
   - Descriptive statistics on Job_Satisfaction, Engagement, Burnout, Performance
   - Correlation analysis between satisfaction and performance
   - Comparative analysis across departments or age groups
   - Visualizations (charts/graphs)
2. **Written Report Component** (Submit .docx):
   - Apply 2-3 motivation theories to explain patterns observed
   - Integrate Indian perspectives (Nishkama Karma, Purusharthas) where relevant
   - Discuss implications of burnout and work-life balance findings
   - Recommendations for improving satisfaction and engagement

**Rubric:**

| Criterion | Excellent (5-6) | Good (3-4) | Developing (1-2) |
|---|---|---|---|

| | | | |
|---|---|---|---|
| **Technical Accuracy** | Excel formulas correct, appropriate statistical methods, professional visualizations | Minor errors in analysis, adequate visualizations | Significant errors, unclear analysis |
| **Theoretical Application** | Deep application of 2-3 theories with Indian perspectives integrated meaningfully | Adequate theory application, surface-level Indian integration | Superficial theory use, minimal Indian perspective |
| **Insight Quality** | Original insights, nuanced analysis, practical recommendations grounded in data | Some insights, reasonable recommendations | Descriptive without insight, generic recommendations |

---

**Assignment 2 (Week 10, 6 marks): Leadership Case Analysis and Organizational Assessment**

• **Word Count:** 1000-1200 words + PowerPoint (8-10 slides)

• **CLO Alignment:** CLO 3, CLO 4, CLO 5

• **Focus:** Analyze a leadership case from Indian organization using OB frameworks; evaluate leadership effectiveness using dataset

**Requirements:**

1. **Case Selection:** Choose Indian organizational leader (from news, business cases, or historical - Gandhi, Narayana Murthy, Ratan Tata, Kiran Mazumdar-Shaw, etc.)
2. **Analysis Components:**
   • Identify and apply 2-3 leadership theories
   • Compare with indigenous leadership model (Krishna/Rama/Chanakya)
   • Evaluate ethical dimensions of leadership decisions
   • Use Bharat Textiles data: Analyze correlation between Manager Feedback scores and team outcomes
3. **Excel Component:**
   • Leadership effectiveness metrics from dataset

- Correlation analysis: Manager Feedback vs. Team Performance
- Comparison across departments with high/low manager ratings

4. **Presentation Component (PPT):**
   - 8-10 slides summarizing analysis
   - Present in Week 10 Session 3 (5 minutes)

**Rubric:**

| Criterion | Excellent (5-6) | Good (3-4) | Developing (1-2) |
|---|---|---|---|
| **Framework Application (35%)** | Sophisticated use of multiple theories; deep indigenous model comparison | Appropriate theory use; adequate indigenous comparison | Superficial theory application; weak integration |
| **Data Analysis (25%)** | Rigorous quantitative analysis; clear insights from correlations | Adequate analysis with some insights | Weak analysis; limited interpretation |
| **Critical Evaluation (25%)** | Nuanced assessment of effectiveness; deep ethical reasoning | Reasonable evaluation; some ethical consideration | Descriptive without critical evaluation |
| **Presentation Quality (15%)** | Clear, engaging slides; confident delivery; good Q&A responses | Adequate slides and delivery | Unclear presentation; poor structure |

---

## 3. Class Tests (12 marks total)

**Test 1** (Week 3, Session 3): **4 marks**

- **Duration:** 15 minutes
- **Topics Covered:** Unit I - Personality, Perception, Values, POB, Indian perspectives

• **Example:** "Apply Trigunas framework to analyze employee behavior in this scenario..."

**Test 2** (Week 6, Session 3): **4 marks**

• **Duration:** 15 minutes

• **Topics Covered:** Unit II (Motivation, Emotions) + Unit III (Groups, Teams)

• **Example:** "Apply Nishkama Karma concept to explain motivation in this scenario..."

**Test 3** (Week 10, Session 3): **4 marks**

• **Duration:** 15 minutes

• **Topics Covered:** Unit IV - Leadership theories, Power, Indigenous models

• **Example:** "Compare transformational leadership with Krishna's leadership approach in this situation..."

**Evaluation Criteria (per question, 2 marks):**

• Correct framework identification/application (1 mark)

• Logical reasoning and justification (0.5 mark)

• Clarity of explanation (0.5 mark)

---

### 4. Attendance (6 marks)

Awarded according to University of Delhi attendance policy.Faculty does not grade this component.

---

## ALIGNMENT: CLOs → PEDAGOGY → ASSESSMENT

| CLO | Primary Teaching Methods | Primary Assessment |
|---|---|---|
| CLO 1: Comprehend foundations | Pre-class readings, mini-lectures, Socratic dialogue | End-term (conceptual questions), Test 1 |
| CLO 2: Analyze | Case discussions, | Test 1, Assignment 1, |

| | | |
|---|---|---|
| individual behavior | self-assessments, data analysis | End-term |
| CLO 3: Interpret team dynamics | Simulations, role plays, case studies | Tests 2 & 3, Assignment 2, End-term |
| CLO 4: Evaluate leadership | Comparative discussions, case analyses, indigenous model exploration | Test 3, Assignment 2, End-term |
| CLO 5: Create strategies | Design workshops, integration activities, projects | Assignments 1 & 2, End-term (synthesis questions) |

This alignment ensures **constructive alignment** (Biggs & Tang, 2011): intended learning outcomes, teaching/learning activities, and assessment tasks are coherently integrated.

---

# PEDAGOGICAL APPROACH AND THEORETICAL GROUNDING

## Learning Philosophy

This course employs a **constructivist, experiential learning model** grounded in adult learning theory (Kolb, 1984; Knowles, 1984) and pedagogical research on active learning (Freeman et al., 2014). The design reflects two core premises:

1. **Knowledge Construction:** Students construct understanding through active engagement with concepts, cases, and peers rather than passive reception (Vygotsky, 1978)

2. **Practice-Based Learning:** OB competencies are developed through deliberate practice in case-based and experiential contexts (Ericsson, 2008)

---

## Flipped Learning Architecture

**Theoretical Basis:** Bloom's (1968) mastery learning and Bergmann & Sams' (2012) flipped

classroom research demonstrate that when foundational content is accessed outside class, face-to-face time can focus on higher-order thinking.

**Three-Phase Learning Cycle:**

**Phase 1: PRE-CLASS EXPLORATION (AI-Assisted)**

• **Time:** 1.5-2 hours per week

• **Cognitive Level:** Remember, Understand (Bloom's lower order)

• **Activities:**

  • Structured readings from core textbooks

  • AI-guided concept exploration and preliminary application

  • Initial framework mapping and example generation

  • Pre-class reflection questions

• **Rationale:** Offloading content transmission frees class time for deeper engagement. AI companions provide individualized pacing, immediate feedback, and personalized scaffolding (Luckin et al., 2016)

**Phase 2: IN-CLASS APPLICATION (Active Learning)**

• **Time:** 3 hours per week (three 1-hour sessions)

• **Cognitive Level:** Apply, Analyze, Evaluate, Create (Bloom's higher order)

• **Activities:**

  • Case-based learning (Williams, 2005)

  • Socratic dialogue probing assumptions

  • Experiential simulations (personality assessments, team exercises, role plays)

  • Collaborative problem-solving with peer feedback

  • Reflective practice

• **Rationale:** Active learning produces higher achievement than traditional lecture (Freeman et al., 2014). Small group work develops collaborative competencies essential for organizational life. Target: **70-75% active learning time**

**Phase 3: POST-CLASS CONSOLIDATION (AI-Assisted)**

• **Time:** 30-45 minutes per week

• **Cognitive Level:** Understand, Analyze, Evaluate (reinforcement and extension)

• **Activities:**

  • AI-guided reflection on class learning

  • Additional practice applying frameworks

  • Online forum discussions connecting theory to practice

- Preparation for subsequent topics

• **Rationale:** Spaced practice and retrieval strengthen retention and transfer (Roediger & Butler, 2011)

---

### Cultural and Contextual Responsiveness

The course intentionally integrates **Indian philosophical frameworks** throughout (Paris & Alim, 2017):

• **Trigunas:** Personality framework parallel to Big Five

• **Purusharthas:** Values framework for meaning and motivation

• **Nishkama Karma:** Alternative motivational philosophy emphasizing process over outcome

• **Krishna, Rama, Chanakya:** Indigenous leadership models offering strategic, ethical, and pragmatic wisdom

**Pedagogical Rationale:** This honors students' cultural knowledge while engaging global OB discourse, supporting culturally sustaining pedagogy. Indian perspectives are **foundational, not additive** - presented alongside Western theories as equally sophisticated frameworks.

---

### Technology-Enhanced Learning

**AI Learning Companions:** Students use AI tools to:

• Explore concepts through dialogue before class

• Generate practice scenarios and receive feedback

• Consolidate learning through reflective questioning post-class

**Pedagogical Rationale:** AI provides adaptive scaffolding adjusting to individual needs, impossible in large classes (80-90 students). When used ethically as learning partner (not answer generator), AI supports metacognition and self-regulated learning (Zimmerman, 2002).

**Critical Principle:** Learning occurs in productive struggle (Bjork & Bjork, 2011). AI should increase cognitive effort, not bypass it.

---

## ACADEMIC INTEGRITY AND ETHICAL SCHOLARSHIP

### Principles of Academic Honesty

This course upholds the university's commitment to academic integrity:

**Expected Conduct:**

• All submitted work must be your original intellectual effort
• Sources must be properly attributed
• Collaboration encouraged for learning; submissions individual unless specified
• Examinations completed independently

**Academic Misconduct includes:**

• **Plagiarism:** Presenting others' ideas/words as your own
• **Fabrication:** Inventing data or citations
• **Collusion:** Unauthorized collaboration on individual assignments
• **Cheating:** Using unauthorized materials during examinations

---

## Ethical Use of AI Learning Tools

This course intentionally integrates AI as **learning partner, not answer generator**.

**AI as Learning Partner (ENCOURAGED):**

✓ Exploring concepts through dialogue to deepen understanding

✓ Testing understanding by explaining concepts to AI

✓ Generating practice scenarios for framework application

✓ Receiving feedback on drafts to identify improvement areas

✓ Brainstorming ideas as starting points

✓ Clarifying confusing concepts

**AI as Answer Generator (ACADEMIC MISCONDUCT):**

✗ Having AI write assignments and submitting without substantial original work

✗ Using AI-generated content without attribution or critical engagement

✗ Bypassing learning struggle

✗ Using AI during examinations or tests

**Pedagogical Rationale:** Learning occurs in struggle with difficult concepts (Bjork & Bjork, 2011). AI should increase cognitive effort and metacognition, not bypass it.

**Attribution:** If AI substantially assists in assignment development, acknowledge briefly: "I used [AI tool] to explore initial ideas and received feedback on drafts, which I then substantially revised based on my own analysis."

---

# COURSE POLICIES

## Attendance and Participation

• Regular attendance essential for flipped learning success

• University of Delhi's attendance requirements apply (typically ≥75%)

• Quality participation valued over mere presence

• If absent, review materials and consult peers before next session

## Communication and Support

• **Online Forum:** Check daily for announcements and discussions

• **Peer Study Groups:** Encouraged; faculty can facilitate formation

## Classroom Norms

• Mutual respect for diverse perspectives

• Active listening and building on others' ideas

• Constructive feedback, not criticism

• Confidentiality for personal examples shared

• Technology use limited to course-related activities

---

# CLOSING NOTE

Welcome to COMC004: Organizational Behavior and Leadership.

This course invites you into a scholarly and practical exploration of human behavior in organizational settings. You will engage with foundational theories while developing applied competencies for effective organizational leadership.

The flipped learning approach requires your active partnership - your preparation, participation, and reflection are central to your learning. Organizational behavior is fundamentally about understanding people, and leadership is about enabling others to thrive. As you develop these capabilities, remember they carry responsibility.

What makes this course unique is our integration of **Indian philosophical wisdom** alongside Western OB theories. You'll explore how concepts like Nishkama Karma, Trigunas, and dharmic leadership offer sophisticated frameworks for understanding and leading in organizations - particularly relevant for Indian contexts but applicable globally.

I look forward to learning alongside you as we explore how ancient wisdom and contemporary research together inform effective, ethical organizational practice.

Let's begin this journey together.

R K Singh
